

Hand Sanitizer Use¹

Staff and Consultants

To minimize the potential for all infections and break the chain of transmission, please follow these hand-hygiene solutions.

- Please clean hands with hand sanitizer when you first arrive to work and after every interaction with a patient or claimant, using the procedure described below
 - Rub hands together for 15 – 20 seconds, until they are dry
 - **Note:** Do not rinse or wipe off the hand sanitizer before it is dry
- Do not touch eyes, nose or mouth with unwashed hands
- Cough or sneeze into the upper sleeve or elbow, not the hands
